Social Studies/Technology

Due to the nature of these courses and the grade level combinations, the instructional material/evaluation will be an ongoing process.

No final exams for Social Studies or Technology.

Homework

- It is the responsibility of students to ensure that assignments, projects, homework, etc. gets completed.
- While there may not be a lot of "assigned" homework, students are expected complete unfinished work at home.
- **Students should actively check into their Google Classrooms, especially if they are absent from school.**

As we navigate through this unprecedented time, it is my hope that all students will have a successful and enjoyable school year.

The health and wellness of your children is our top priority. I encourage you to continue to support your child's schooling and the efforts of their teachers.

Feel free to contact me at any time during school hours to discuss your child's progress.
